

## MEMORANDUM OF UNDERSTANDING

Under the authority of the Forest and Rangeland Renewable Resources Research Act of 1978 (92 Stat. 353, Public Law 95-307, June 30, 1978), the United States Department of Agriculture, Forest Service, Southern Forest Experiment Station, desires to cooperate with the State of Baden-Wurttemberg, Forest Service Division of the State Ministry of Agriculture, to carry out study No. FS-SO-2203-1.48, a copy attached and made a part of this Memorandum of Understanding.

It is mutually understood that:

Papers will be prepared for publication as often as the results of the study warrant publication. Any publication of these results by either party will give appropriate recognition to the contributions of both parties.

The information gained from this study will be mutually beneficial because it will facilitate the dissemination of research information to interested parties, which is an aim of both parties.

There will be no exchange of funds or international travel involved.

This Memorandum of Understanding may be terminated by either party by giving 60 days notice to the other in writing. Unless so terminated or amended or extended by mutual consent of both parties it will remain in force until December 31, 1982.

This Memorandum of Understanding will be effective as of the last date written below.

Dear Dr. Bogenschütz:

Enclosed are two copies of a Memorandum of Understanding to cover our cooperative effort on a study entitled, "The mites associated with Ips typographus--A search for exotic mite predators of the southern pine beetle." If it meets with your approval, please have both copies of the Memorandum of Understanding signed on behalf of the State of Baden-Wurttemberg, Forest Service Division of the State Ministry of Agriculture, and return them to this office. After signature and processing here, an executed copy will be returned for your file.

We greatly appreciate your cooperation on this study.

Sincerely,

WALTER A. HOUGH

THE MITES ASSOCIATED WITH *IPS TYPOGRAPHUS*--A SEARCH FOR EXOTIC  
MITES PREDATORS OF THE SOUTHERN PINE BEETLE

This study surveys the phoretic mites of *Ips typographus* flying adults with the primary objective of finding one or more exotic predators that could be used to control the southern pine beetle. Secondary objectives are to compile a list of mites phoretic on the flying adults of *Ips typographus* in southern Germany, and to detect any differences in mite species and abundance between the three flight peaks.
